CYBERSECURITY GRC | AGILE & PRODUCT DELIVERY | AI GOVERNANCE | PROGRAM MANAGEMENT

McKinney, TX | (940) 448-0244 | seunolawepo2010@gmail.com | https://seunolawepo.com/

PMP | CRISC | CompTIA Security+ | Active Public Trust (USDA)

PROFESSIONAL PROFILE

Cross-functional technology, cybersecurity governance, and delivery professional with experience spanning financial services, federal government, healthcare, and payments. Leads GRC programs, risk and control assessments, policy governance, audits, and third-party reviews while translating business requirements into delivery plans, workflows, and measurable remediation. Hands-on with ServiceNow IRM, Agile/Scrum practices, business analysis, AI governance, and enterprise project coordination. Available for remote consulting, contract, and permanent opportunities.

CORE EXPERTISE

Cybersecurity GRC & IT Risk: NIST CSF / SP 800-53 / RMF; SOC 2; ISO 27001; SOX ITGC; NYDFS; PCI DSS; HIPAA / HITRUST; GLBA; FedRAMP; audit readiness; policy governance; third-party risk; control testing; risk registers; BCDR

Agile, Product & Program Delivery: Scrum facilitation; PI planning; backlog refinement; sprint planning/reviews; UAT; business requirements; process mapping; stakeholder management; RAID logs; release coordination; PMO reporting; Product Owner / RTE-aligned delivery

AI & ServiceNow: NIST AI RMF; AI model inventory and risk classification; AI/ML feature evaluation; AI agent workflow oversight; ServiceNow IRM/GRC, UCF integration configuration, regulatory change notifications, policy workflows, UAT and remediation; OneTrust migration; Azure DevOps; Jira; SharePoint; Power BI; Claude Code / Design

PROFESSIONAL EXPERIENCE

Info Sec GRC Analyst Senior | LoanDepot | October 2025 – Present

- Coordinated NYDFS and PCI DSS certification activities, validating evidence and preparing assessment documentation for CISO approval; supported SOC 2, ISO 27001, SOX ITGC, GLBA and CCPA workstreams.
- Owned policy, standard and procedure workflows in ServiceNow IRM, partnering with Legal, Compliance, ERM, Data Governance and technical control owners from drafting through approval and publication.
- Managed risk registers, exceptions, remediation, issue aging and regulatory MRA findings; gathered closure evidence and prepared leadership-ready risk and compliance reporting.
- Configured UCF integration with ServiceNow IRM to automate regulatory change notifications and support continuous compliance monitoring across applicable requirements.
- Supported OneTrust-to-ServiceNow IRM migration through workflow implementation, stakeholder validation, UAT, defect resolution and production readiness; trained business and control owners.
- Conducted vendor security reviews using questionnaires, SOC reports and certifications; documented gaps and coordinated risk treatment with internal and external owners.
- Worked across technical and business teams to clarify requirements, coordinate delivery activities and improve consistency of GRC evidence and policy workflows.

Senior Governance, Risk & Compliance Analyst | TSPI / USDA | May 2023 – October 2025

- Supported security assurance and governance across 70+ enterprise applications, coordinating with Information Security, Infrastructure, Privacy, ERM, Data Governance and Software Engineering.
- Assessed approximately 94 NIST SP 800-53 controls, interviewing owners, validating implementation evidence and recording control gaps in ServiceNow IRM.
- Tracked 70+ audit findings, POA&Ms and corrective actions, monitoring ownership, risk aging, evidence sufficiency and closure.
- Coordinated internal/external audit requests, policy governance, third-party assurance reviews and federal compliance documentation.
- Configured UCF integration with ServiceNow IRM to support regulatory requirement monitoring and notifications for compliance stakeholders.
- Evaluated internal and vendor AI use cases using NIST AI RMF considerations; prepared KPI/KRI dashboards for leadership.

Senior IT Risk & Controls Analyst | Fidelity Investments | January 2019 – April 2023

- Led technology risk and control assessment workstreams across 50+ applications, evaluating control design, operating evidence, deficiencies and remediation ownership.

- Configured UCF integration with ServiceNow IRM to centralize regulatory change tracking and support timely identification of updated requirements.
- Coordinated NYDFS, PCI DSS, SOC 2 and ISO 27001 readiness, including evidence collection, control walkthroughs, auditor responses and CISO sign-off preparation.
- Used ServiceNow IRM for risk registers, issue tracking, regulatory mapping and evidence workflows; collaborated with cross-functional stakeholders on policies and governance.
- Prepared leadership KPI/KRI reporting and coordinated corrective actions for 70+ findings and control deficiencies.
- Supported business continuity and disaster recovery planning, business impact analysis and recovery requirements with technology and business SMEs.

Business Analyst | UnitedHealth Group | February 2016 – January 2019

- Translated healthcare business, technology, security and regulatory needs into requirements, process documentation, workflow designs and acceptance criteria.
- Coordinated Agile ceremonies, backlog discussions, UAT, defect triage and implementation readiness with business and technology teams; used Jira and SharePoint.
- Supported HIPAA / HITRUST control reviews, identity and access governance, Salesforce healthcare workflows and remediation documentation.

Business Systems Analyst | Mastercard | January 2012 – February 2016

- Gathered functional, technical and compliance requirements for payments initiatives; supported Agile planning, backlog refinement, UAT, release validation and change management.
- Supported PCI DSS audit readiness and coordinated security/control requirements with architecture, engineering and business stakeholders.

Project Coordinator | AT&T | January 2009 – January 2012

- Coordinated project plans, Agile/Scrum ceremonies, stakeholder updates, requirements, change management, RAID logs and implementation activities for technology initiatives.

ADDITIONAL AI & DELIVERY EXPERIENCE

Independent AI product development (D3command): Hands-on AI/ML feature evaluation and launches, including model latency, API/token costs and product economics. Uses Claude Code and Claude Design for prototyping and delivery workflows. Experience informs AI governance, responsible AI assessments and agent-oriented program coordination.

CERTIFICATIONS & EDUCATION

CRISC • CompTIA Security+ • PMP • SAFe Release Train Engineer • PSM I • PSPO I • Pega Certified Business Architect

M.S., Information Technology Project Management — Northcentral University | B.S., Civil Engineering Technology — University of Ilorin
